

KWIKRACK

Our new Kwikrack offers a robust and cost effective storage solution for any application. The unique 6 fold channel beam offers shelf capacities of 300kgs with a shelf height of only 54mm. The design of the beam allows for an inset chipboard decking design with interlocking deck supports for a strong and robust shelf level.

The system is simple to erect, yet has all the strength you are likely to need. The bays just tap together with a rubber mallet so you can organise your storage in a fraction of the time it can take with more traditional systems. With a build time of just 10 minutes, large installations will be completed in no time at all.

- **Easy to assemble and re-configure**
Build a bay in 10 minutes with a rubber mallet
- **Will suit any application**
A versatile range, ideal for home, garage or industry
- **Best value shelving system**
With shelf capacities of 300kgs at great prices
